

# HOME PAGE

When the user wants to use the emergency feature,

They must choose the **RED** Emergency SMS button on the Main Page

# MAIN PAGE

When in need of immediate Help or any danger not specified, click the **RED** button for immediate SMS

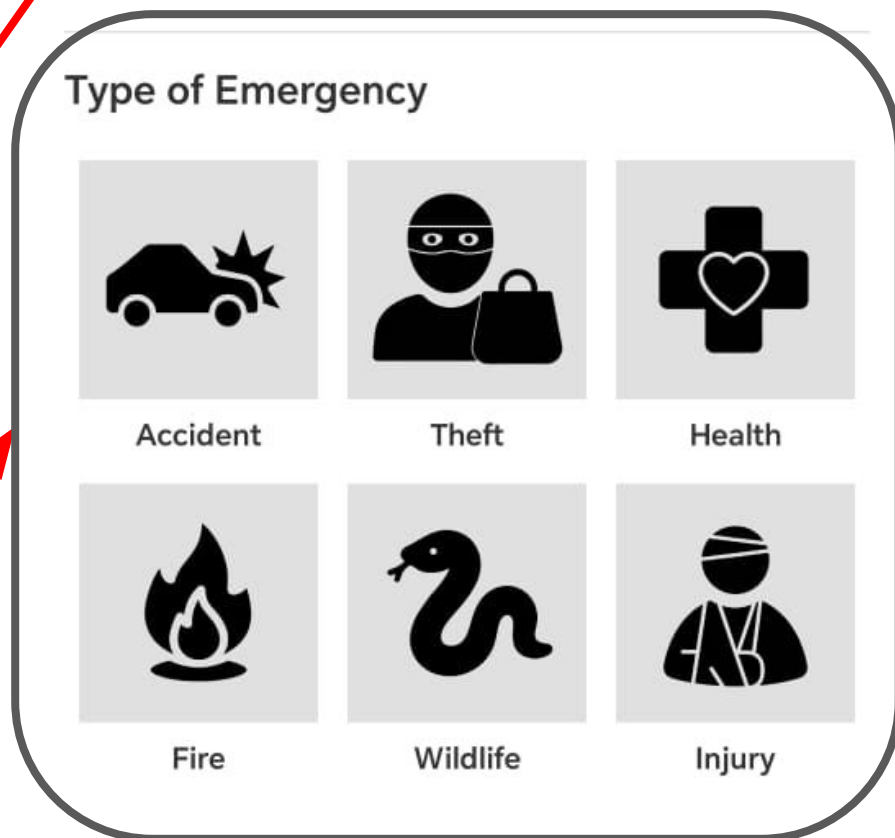

Personal Contact

Tap on this button to **create** a new contact

Amni — 0162193045

Click On the Contact Saved to sent message to specific number rather than authorities

Choose One of the emergency types when you know the situation

# CREATE NEW CONTACT

Enter New Contacts  
Name and Number to  
Add

The screenshot shows the 'HearMe' app interface. At the top, there's a yellow header with a back arrow and the 'HearMe' logo. Below the header is a white card titled 'Add New Contact'. It contains two input fields: 'Contact Name' with the text 'Taufiq' and 'Contact Number' with the text '0149478944'. Below these fields is a yellow 'Save Contact' button. Underneath the card is a section titled 'Existing Contacts' which lists two contacts: 'Amni' with number '0162193045' and 'Ana' with number '01111712290'. Each contact entry has a red trash bin icon to its right. The 'Ana' entry's trash icon is highlighted with a red square. Red arrows point from the instructional text boxes to the corresponding UI elements: from the first box to the input fields, from the second box to the 'Save Contact' button, from the third box to the 'Amni' contact entry, and from the fourth box to the trash icon of the 'Ana' contact entry.

After Entering Contact  
info click this button to  
save the Contact

Saved Number List

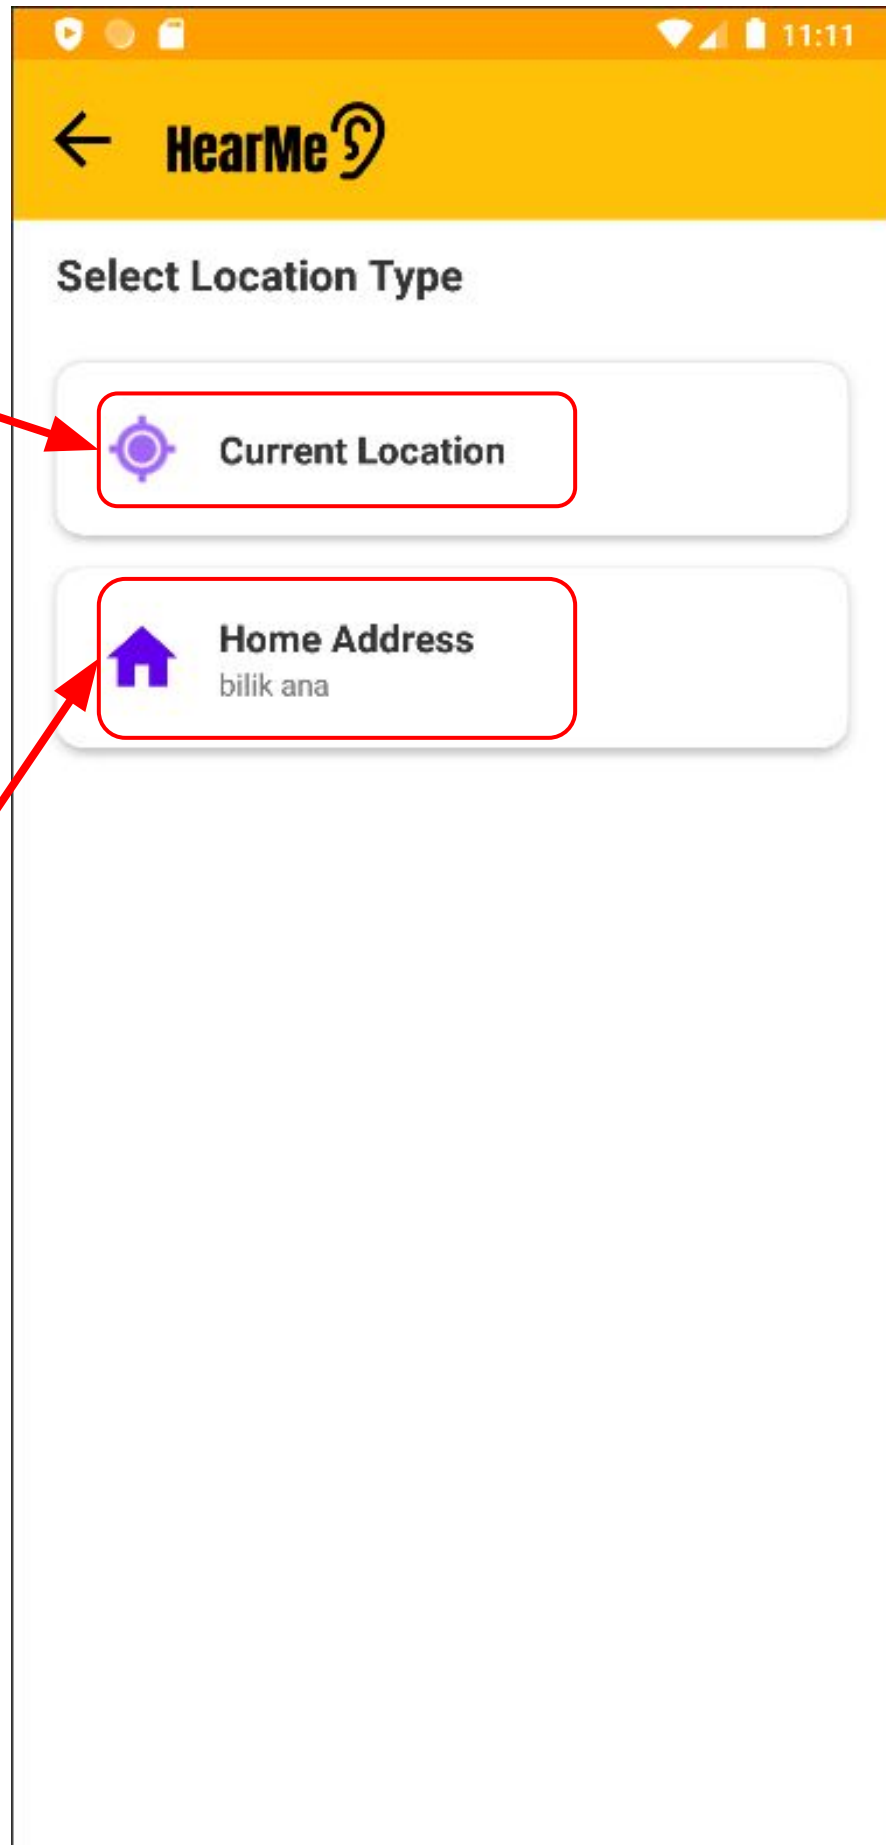

To Delete unused or  
mistaken numbers, click  
the Bin button beside the  
Number

# LOCATION TYPE

Choose

## Current Location

When you are in any  
are besides home for  
emergency

Choose

## Home Address

When emergency  
at home  
For a **more  
specified location**

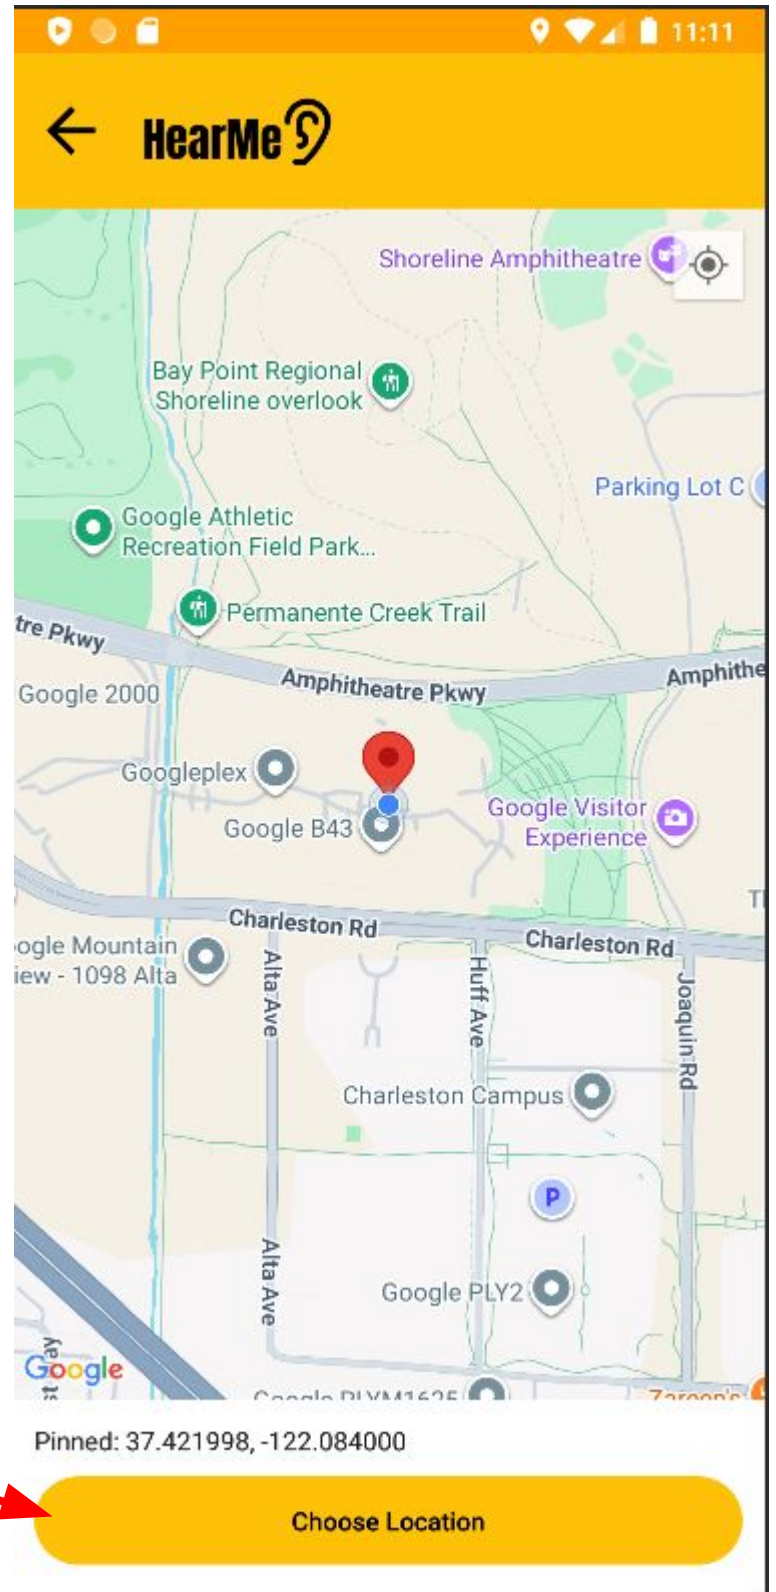

# CURRENT LOCATION MAP

This page shows your current location if the user picks “**Current Location**” choice in location type

Please **Enable Location** on your phone for the map to function correctly

If location is not enabled, enable location and **go back to the previous page** to get the accurate location

When Current Location is done Correctly, the “**Choose Location**” Will be functional

# MESSAGE PAGE

This Page will show the Final Result of the message and what will be given to the **Authority / Number** with full information needed for emergency service

When Clicking on the **Hantar Button**, the message will be sent straight to the emergency number's SMS
