

HOME PAGE

On the **Home Page**, select who will initiate the conversation ,**the deaf user** or the **non-deaf person**.

- Tap **Speak to non-deaf** if you (the deaf user) wish to start the conversation.
 - Tap **Hear from non-deaf** to allow the non-deaf person to begin the conversation.

SPEAK TO NON-DEAF

Use the toggle button to select either **Malay** or **English** for communication.

Type your message in the text field.

Alternatively, long-press the text field to choose from predefined phrases.

Tap the **SPEAK** button to let the AI read your message aloud. The spoken message will also be saved in the **History** section.

Tap the **Reply** button to switch to the *Hear from Non-Deaf* screen, allowing the other person to respond.

PREDEFINED PHRASES

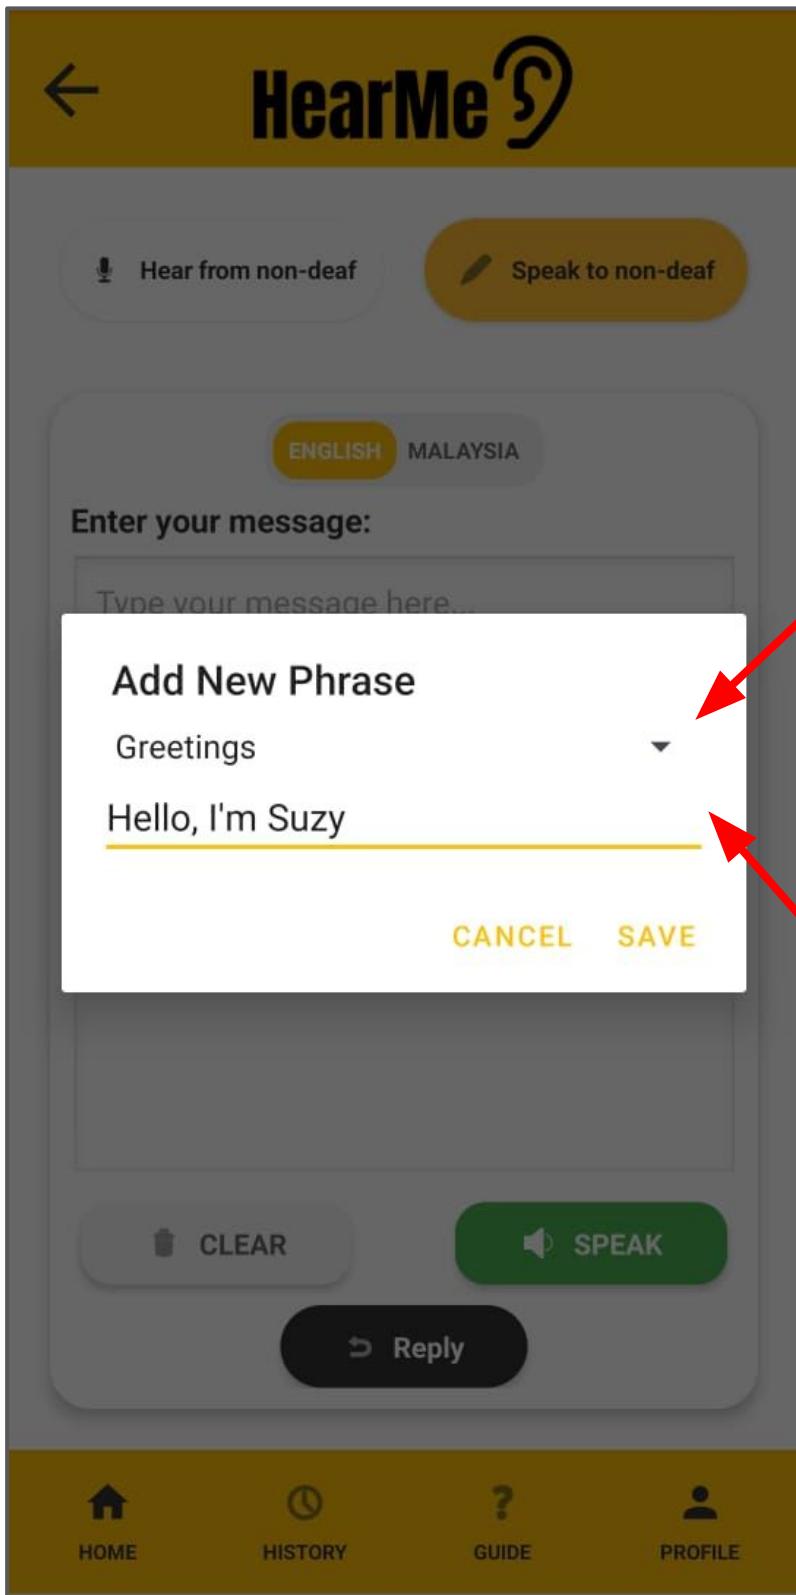

Long-press on the text field will activate a message box containing list of predefined common phrases that people usually use.

The phrases have been categorized for better searching purposes.

You can custom your own phrase to avoid repeating the same phrases or phrases that you use oftenly.

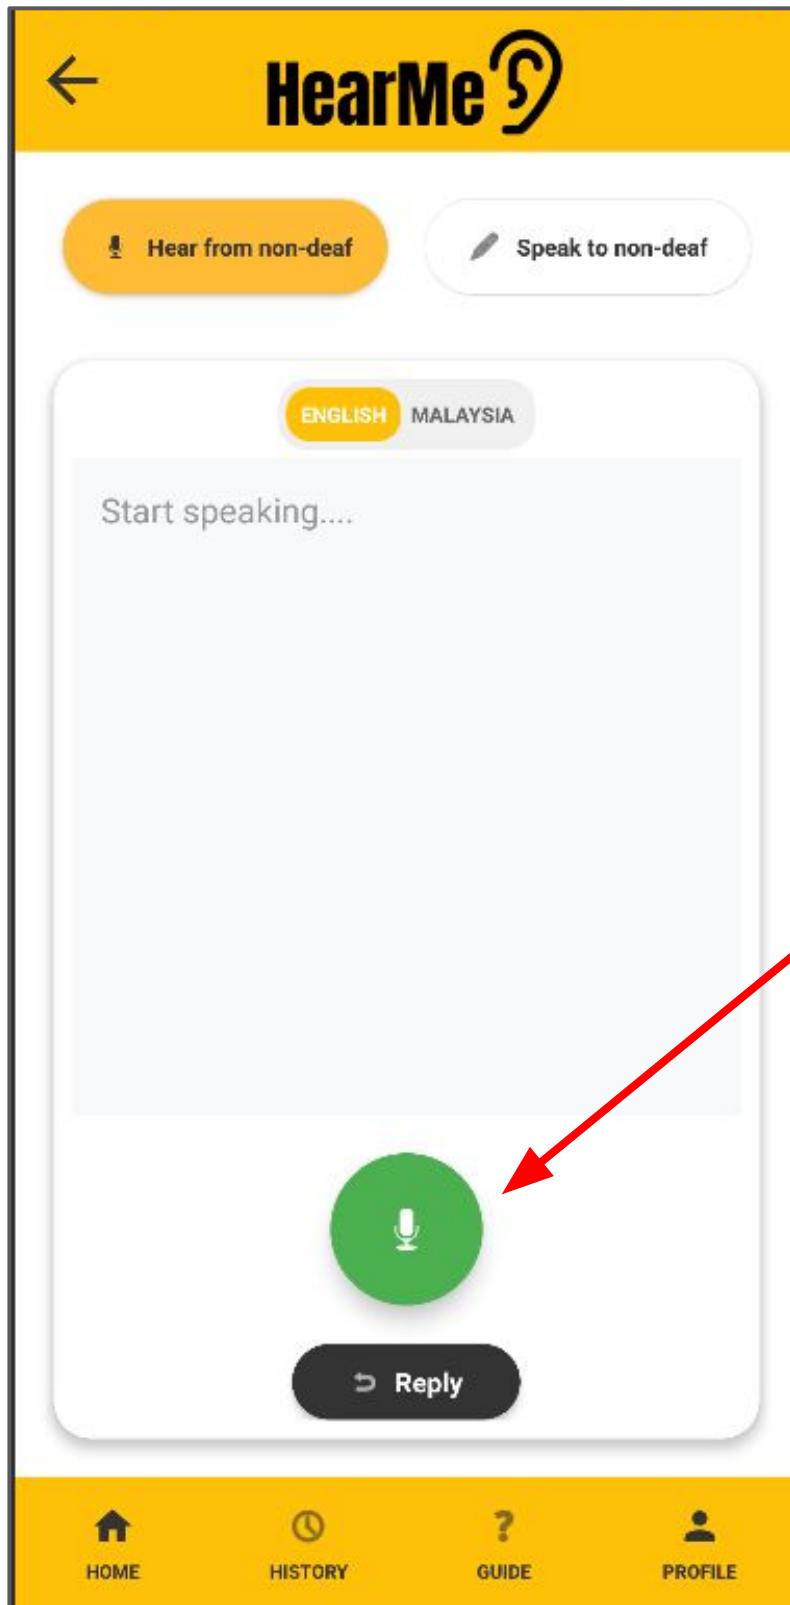

Tap the **Add New Phrase** (+) button in the dialog box.

Choose category
of the phrases
(Greetings,Thanks
or Questions).

Enter the phrases and
click save.

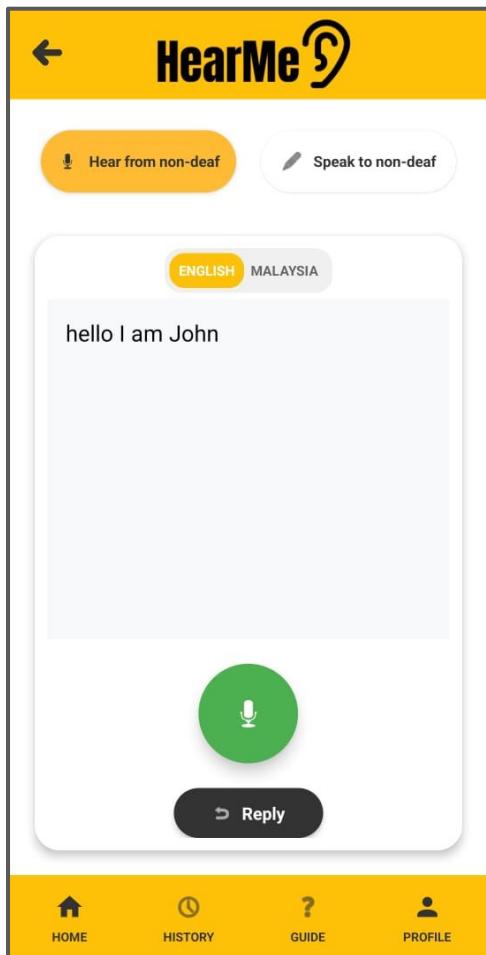

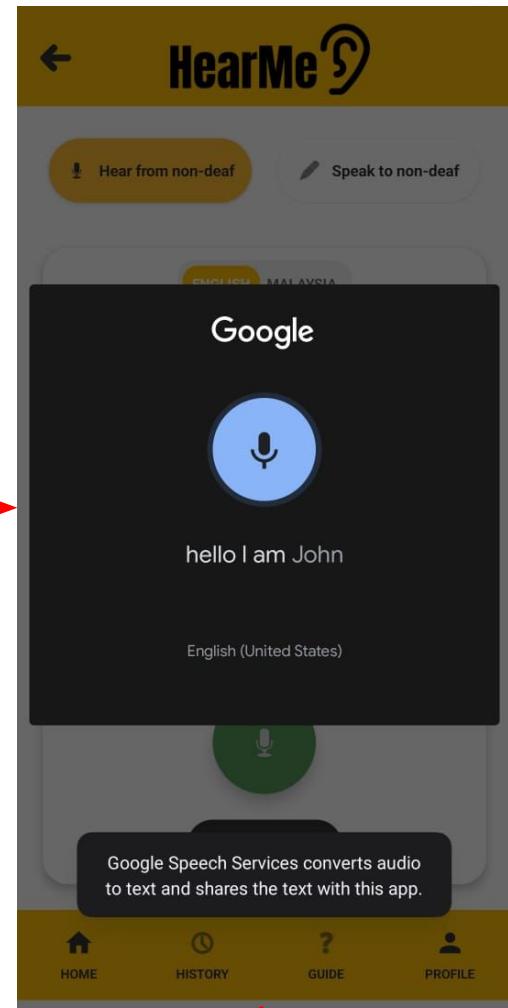

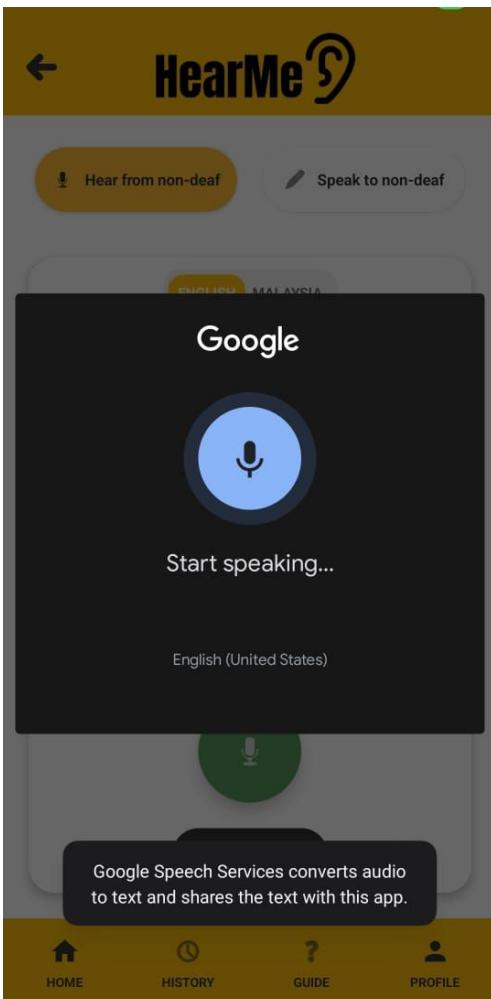

HEAR FROM NON-DEAF

Click the microphone button to start speaking.

The app will request permission to use your device's microphone.

Tap **Allow** so the app can capture and transcribe speech.

When the non-deaf person speaks, their voice will be automatically converted into text and displayed on the screen.

To respond, tap the **Reply** button. This will take you back to the **Speak to Non-Deaf** screen.
